

Strength in Numbers: Setting Quantitative Criteria for Listing Species Under the Endangered Species Act

*Kalyani Robbins**

I. INTRODUCTION.....	2
II. AN OVERVIEW OF THE ESA AND LISTING SPECIES	5
A. <i>In the Beginning: The Evolution of U.S. Endangered Species Legislation and Listing Priorities</i>	5
B. <i>The ESA Listing Process</i>	7
C. <i>Lock, Stock, and Barrel: The Benefits of Getting Past the Velvet Rope</i>	10
III. DOOMED FROM THE START: HISTORY OF A FLAWED AND DAMAGED LISTING SYSTEM	11
A. <i>A Poorly Articulated Directive: Ambiguity and Excessive Discretion</i>	12
1. This “Best” is Better Than What, Exactly?	12
2. How Endangered is Endangered? How Threatened is Threatened?	12
3. That’s a Lot of Discretion	13
B. <i>The Fallibilities of Science in Relation to the ESA</i>	14
1. Science Cannot Determine Policy.....	15
2. Nothing is Certain: Deal With It.....	16

* Assistant Professor of Law, University of Akron School of Law; BA, University of California at Berkeley; JD, Stanford Law School; LL.M., *cum laude*, Environmental and Natural Resources Law, Lewis & Clark Law School. The author wishes to thank Professor Dan Rohlf for his advice and suggestions regarding this Article, as well as the many others (too numerous to list here) who provided written feedback and/or actively engaged the author during her power point presentations of the work.
